

Monitoring

Real-Time Monitoring and Alerts for High-Risk Vehicles

When it comes to monitoring high-risk vehicles, DRN leads the industry with the largest LPR database, featuring historical and real-time vehicle location records. Harness the power of DRN's expanding vehicle location data to keep a close watch on vehicles of interest. Receive instant alerts for new vehicle sightings and images, empowering underwriters, claims adjusters and fraud investigators to combat fraudulent behavior, mitigate risks and minimize losses.

Why Monitoring?

01

Real-time Alerts & Accurate Data: Get up-to-date, timely email notifications from our growing vehicle location database to proactively keep tabs on any vehicle of interest.

02

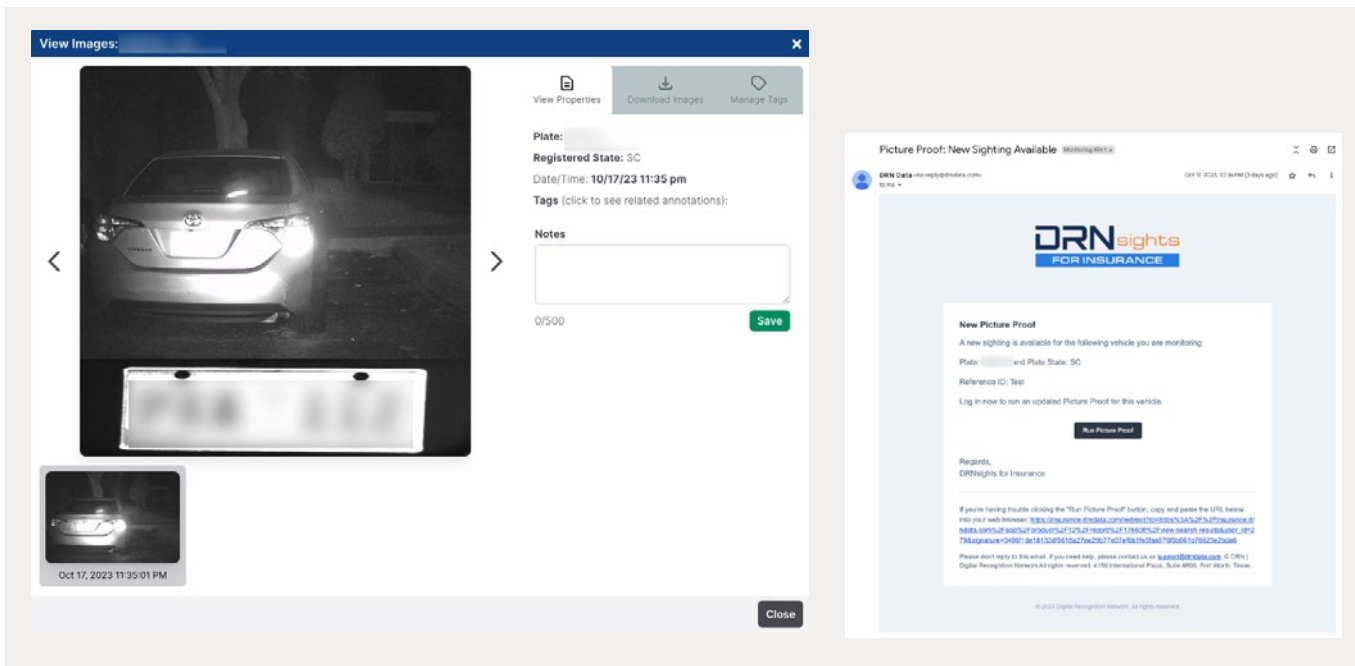

Underwriting Optimization: Monitor potential high-risk vehicles by setting up alerts if any sightings of the vehicle may indicate a potential risk of loss. This assists in optimized pricing decisions and minimizing losses from fraudulent claims being paid out.

03

Enhanced Investigations: Amplify investigations with real-time insights into the movements of target vehicles. Receive alerts regarding the whereabouts of these vehicles, providing crucial information to investigate and mitigate fraudulent claims effectively.

How Does Monitoring Work?

01

Select a Vehicle Record: Choose a specific vehicle record from Vehicle Search, Picture Proof or Address Analysis that you want to monitor.

02

Activate Monitoring: Simply click the “Monitoring” button for the chosen vehicle record to start receiving instant notifications.

03

Receive Prompt Alerts: Once Monitoring is activated, prompt email alerts will be sent as soon as the vehicle has been detected, allowing the most up-to-date sighting details.
