DRNsights Vehicle Search

ON-TARGET ASSIGNMENTS MEAN ON-TIME RECOVERIES.

Avoiding charge-offs with timely repossessions is critical to protecting revenue. DRNsights Vehicle Search uses billions of license plate detections and advanced analytics to give you accurate, up-to-the-minute data to help you quickly locate, assign and recover more vehicles.

Identify Reliable Recoveries

Focus your time and effort on vehicles at verified locations. Upload your accounts and get immediate confirmation on good addresses with our billions of real-time detections and intelligent scoring algorithm, and start repossessing more vehicles.

Act Fast on Elusive Drivers

Work smarter–not harder–to recover vehicles. Configure real-time alerts and immediately assign hard-to-find vehicles for repossession. Even identify a vehicle loss early so your recovery agents are efficient and your team can take action.

Improve Account Management

Simplify resource allocation and enhance performance monitoring to optimize your recovery operation. Filter and organize accounts, easily visualize account statuses, and even export your data for your own advanced analysis and review.

KEY FEATURES

Flexible Account Upload: Create account records manually, through batch upload or using API-based integration.

Address Scoring & Suggestions: Prioritize recovery efforts with scored account information and suggested contact addresses sourced from our data.

Up-to-Date Sighting Summary: View all vehicle location data together on a map or in a list that updates in real-time with new detections as they occur.

Configurable Notifications: Stay informed of new vehicle sightings with alerts based on your own parameters.
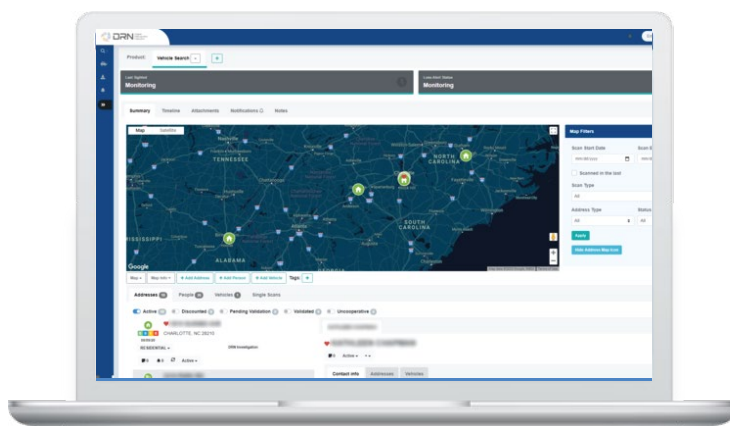

Repo System Integration: Assign repo orders to preferred agents directly from the account in just a few clicks.

Account Filtering & Assignment: Let users filter accounts on their own or proactively allocate workloads by user or group-based assignment.

Loss Alert Status Monitoring: Make informed account decisions and appropriately adjust strategy by knowing when a vehicle loss has occurred.

Key Performance Indicators: Monitor progress on accounts and pinpoint areas of potential concern with easy-to-read charts and graphs.

Non-Intrusive Data Exporting: Batch export data in the background as you continue to work.

Real data, real analytics, real results.
