

Be the first to know what happens to your assets

Over 2,000 vehicles are stolen* and over 18,000 police-reported accidents occur daily in the U.S.** DRNsights Loss Alerts provide real-time alerts when a vehicle loss is reported, helping you avoid unnecessary impound fees and be aware of vehicles involved in accidents, theft or fraudulent export.

Avoid Impound Fees

Impound fees can average more than \$600 a month. Receive easily configurable alerts to know quickly when one of your assets has been impounded, so you can secure it quickly and avoid or shorten the costly impound process.

Improve Claims Processing

Know earlier on when a vehicle has been involved in an accident and sent for salvage, or that a theft has occurred, to promptly take action and work with the insurance carrier and driver to ensure appropriate payoff.

Stop Fraudulent Export

Each year, it is estimated tens of thousands of salvage titled vehicles are illegally exported out of the United States. Learn of possible fraudulent export of your assets and retrieve them before they leave the country.

“Working with DRN continues to be a great experience. The ability to get first-hand notifications of Loss Alerts electronically makes it less of a risk to the credit union. It gives us a chance to work that account as soon as possible and avoid any potential loss to the credit union.”

Collections Manager at Dade County Federal Credit Union

How It Works

DRNsights Loss Alerts in action

01

Easily upload VINs or license plates to be monitored and set up with customized alerts.

02

DRN continuously compares your vehicle list to the various loss databases.

03

Receive an alert if a vehicle is impounded, salvaged, stolen or sent for export.

Real data, real analytics, real results.
